SHRAVAN A. KULKARNI

Objective:

Senior Engineer with 12+ years of experience delivering high-impact solutions for Fortune 500 companies, Industry leaders, across global domains. Expertise in frontend architecture and **UI engineering, currently transitioning into Agentic AI Engineering**—focusing on autonomous agent workflows, LLM integration, RAG Pipelines and human-in-the-loop interfaces. Seeking to leverage deep software design experience to build next-generation AI products with a forward-thinking engineering team.

Summary:

.

- **10** years of work experience in **WEB DEVELOPMENT**, creating pixel perfect screens, complicated workflows with Responsive UI and security features.
- Experience on up to date advance web development technologies Angular, Node JS, ,Java Script, Type Script, CSS3, HTML5 with supporting libraries like NgRx and RxJS .
- Skilled in Agentic workflows like LLM integration(with all major models like OpenAI, DeepSeek, Gemini..) RAG pipelines, MCP and securing the Agents with Evals, Guardrails, Structured Outputs and Observability with LangSmith, Traces.
- Work with different **Agent Development** tools like, Google ADK, Microsoft AutoGen, AWS Strands, Pydantic AI,
- **Agentic AI** development using different state of art frameworks and tools to optimally leverage the best features offered by tools in different problem contexts.
- Multi-Agent orchestration using frameworks like CrewAI, Langgraph with strategies to minimize hallucinations and token consumption.
- Extensively worked in Agile Development and aware of the different roles/process/responsibilities in a Scrum team.
- Strong in interpreting existing code and understanding the process flow from a business perspective.
- Excellent analytical, problem solving, communication and inter-personal skills.
- Proficient in analyzing, designing and implementing applications for complex Business requirements.
- Exposure to communicate with clients and working as part of diverse, multi cultural teams.

Technical Skills:

Scripting Languages	JavaScript, Typescript,Python
UI Frameworks and Technologies	Angular, JavaScript, HTML5, CSS3, Bootstrap, Karma/Jasmine, NgRX, RxJS
Agentic AI	Python, LangChain, LangGraph, LangSmith, Crew AI, Google ADK, Microsoft AutoGen, AWS Strands, Pydantic AI, Hugging Faces, Vercel

I am skilled in scripting languages like Javascript, TypeScript,Python. Javascript and Typescript along with HTML,CSS I have worked on extensively in almost all of my projects, integrated with different other UI libraries and frameworks like NgPrime, Bootstrap, Angular Material, RxJs, state management using NgRx.

Python, while I don't have direct coding experience, I have fundamental knowledge and versed enough to understand the code and flow and be able to work with frameworks like Langchain, FastAPI, Pydantic, NumPy,Pandas .

Professional Experience

Organization	Designation	Period
Drone Aerospace Systems	Research Engineer	10/2011-04/2016
Intellect Design Arena	Consultant	08/2016-08/2017
Technosoft / Unisys	Senior Software Engineer	04/2018-01/2021

Datamatics	Senior Engineer/Applications	07/2021-08/2022
Genpact	Principal Consultant	08/2022-

Education

Degree	Institution/University	Score	Year
Bachelor Of Engineering	Information Science and Engineering (BNMIT, VTU)	72% (AGGR)	2007-2011
Master Of Technology	JAIN UNIVERSITY	8.269 (CGPA)	2013-2015

Previous Project Experience

- **Development and Commercialization of C-bird.(Drone Aerospace)**

  The problem of transferring data between pen drives without aid of a computer was a long unsolved problem, which was addressed through a cell phone. A device was developed which made use of the then just released OTG enabled mobile phones to transfer data between the pen drives. An app was written for android, which could be used to select target destination and files to be transferred. It was commercially released by Drone Aerospace Systems, an incubate of Jain University and sold online via Amazon. A patent has been filed for the same at Indian patent office which is due for review.

Language: Java (Android)

Role: Innovator, Developer,

- **Data Modeler module for a Web Application(Intellect Design Arena)**

  Data Modeler is a tool for configuring the properties of data that a control is supposed to take on in a web form. It is a small module within an application called HUBS, a premium product of Intellect Design Area Pvt. Ltd. Work entailed building a screen using Bootstrap, HTML alongside an internally developed framework.

Technologies: HTML, JavaScript, JQuery, Bootstrap, momentJS. Oracle.

Role: UI Developer

- **LineSight- a border security Application of Unisys**

Linesight is a tool developed by Unisys for passenger profiling at ports and terminals, to look up travel history, past crime records, watchlists of various Investigation agencies to spot suspicious travelers.

I was part of the team that built its rich UI with Grids, Trees and security built from the ground up.

Tools: Angular JS/HTML/CSS/Bootstrap/Smart Admin.

Role: UI Developer

- **Inteliapp: an easy-to-use app for Enterprises to facilitate internal communications and track the status of service requests(Unisys)**

Inteliapp is an easy-to-use Service Desk application for customers of Unisys to easily create tickets, track its status and report back on their experience. It is a mobile application that supports both Android and IOS phones, built using React Native.

I was part of the core development team

Tools: React Native with Redux

Role: U.I Developer

- **IGPM -PVA: Plant Volume Allocation Module of Planning tool.(Datamatics, service, web-development)**

It is an internal Information System and Planning tool used by a leading automotive company in Germany to plan its procurement/production/sales activities.

I was part of the team that develops a module of this huge application.

Tools: Angular, HTML, CSS, RXJS, Ag-grid, Jasmine/Karma, Angular-Material, Sandbox Architecture

Role: UI Developer

- **Core business application of a leading US pharma company(Genpact, Web Development)**

Involved in the User Interface development of a fortune 500 company application that serves various actors and stake holders to perform their daily operations. It is an existing and running application which requires upgradation with new features and industry defining programs/campaigns that are to be incorporated into existing application.

Tools n Technologies used: Angular 13, ng prime, HTML,CSS, Typescript.

Location Preference:

I am from Bengaluru and my aging parents require me to be around. So I prefer to work from Bengaluru. I am also open to Hybrid jobs in Mumbai, Pune, Chennai and Hyderabad, if I am required to be in office for less than 10 days in a calendar month, in one stretch.

Salary expectations:

Shravan's current CTC is as per industry standard and expects to be rewarded tantamount to the value he brings, which depends on a lot of factors like role, technology, future scope, remote-work and many more. The exact number is something only he can answer. Kindly call or email him to negotiate on this matter.
